EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Walter on February 1, 2006.

The application has been amended as follows:

I in the claims

a) Claim 1

An apparatus for holding a bottle while feeding an infant, comprising:
a weighted support member that rests on an infant's torso while feeding an infant, and is conformable to the infant's torso; and,
a bottle holder, operatively connected to and extending upwardly from the support member, and the bottle holder is moveable with respect to the support member to move a bottle toward or away from an infant's mouth;
said bottle including two prongs extending upwardly from the support member, spaced apart from another and moveable with respect to one another to support or remove a bottle from the bottle holder.

b) Claim 2 has been cancelled.

c) Claim 8

An apparatus for holding a bottle while feeding an infant, comprising:
a weighted support member that rests on an infant's torso while feeding an infant, and is conformable to the infant's torso;
a bottle holder, operatively connected to and extending upwardly from the support member, and the bottle holder is moveable with respect to the support member to move a bottle toward or away from an infant's mouth; and,
the bottle holder and support member are integrally connected as a single unit; said the bottle holder and support member comprise a single casing encapsulating one or more internal components operably connected to one another; wherein the internal components include a weighted compressible filler in a bottom of the casing, and an internal frame member disposed on top of the filler and having two upwardly extending prongs for holding a bottle, and the internal frame member is moveable with respect to the filler.

d) Claim 9 has been cancelled.

e) Claim 10 has been cancelled.

f) Claim 11

The apparatus of claim 8 ~~40~~ wherein the internal components further comprise a lightweight compressible filler within the casing covering the internal frame member.

g) Claim 12

The apparatus of claim ~~8~~ 10 wherein the internal frame member comprises a transverse base member resting on the weighted, compressible filler, and the transverse base member is attached to a bottom end of each of the prongs, and the casing has a seam formed therein and disposed between the transverse base member and weighted filler, whereby the internal frame member pivots with respect to the seam.

h) Claim 13

An apparatus for feeding an infant, comprising:
a bottle for dispensing an edible fluid to an infant;
a weighted support member that rests on an infant's torso while feeding an infant, and is conformable to the infant's torso; and,
a bottle holder, operatively connected to and extending upwardly from the support member, within ~~which~~ a said bottle is secured, and an elevation of the bottle is adjustable within the bottle holder and with respect to the infant to position the bottle for feeding; wherein the bottle holder includes two prongs extending upwardly from the support member, spaced apart from another and moveable with respect to one another to support or remove a bottle from the bottle holder.

i) Claim 15 has been cancelled.
